PRESS STATEMENT

Launching of HUDO Centre's Database on the Occasion of International Human Rights Day

On this Human Rights Day, HUDO Centre is pleased to announce the official launching of its Uwazi database as an important step toward enhancing transparency, facilitating access to information, and supporting monitoring and documentation of human rights violations in Sudan.

This launch is aligned with HUDO Centre's vision: *"A world where everyone's human rights are protected and fulfilled without discrimination."*

It also reflects the commitment to its mission: *"To champion universal access to rights-based information and services to vulnerable and underserved communities through sustainable innovations, humanitarian support, strategic partnerships, rights empowerment, capacity building, research, and advocacy."*

The new database aims to provide a modern and comprehensive platform that enables researchers, activists, journalists, and all those interested in human rights to access reliable and updated information that can be used in studies, reports, and rights-based initiatives.

The database includes:

- An archive of verified human rights reports (mostly in South Kordufan/ Blue Nile and Blue Nile States) since 2011.
- Analytical data that helps identify key patterns of human rights issues.
- A user-friendly interface that allows smooth browsing and searching.
- Regular updates to ensure accuracy and responsiveness to developments on the ground.

This initiative reflects HUDO Centre's dedication to promoting justice and human dignity, making effective use of technology in the service of human rights, freedom, and expanding access to rights-based knowledge.

We invite you to visit, explore HUDO Centre Uwazi database (<https://hudo.uwazi.io>), and contribute to spreading human rights knowledge, building more informed and empowered society particularly within this miserable and difficult time that Sudan population is experiencing.

HUDO Centre - together we can
