Al-Abbasiya is the capital of Al-Abbasiya locality in South Kordufan state. The Nawafil petrol station is one of the four (4) in Al-Abbasiya town and it's located in the middle of the town, and there is no military base nearby. Because of the ongoing war, there is shortage of fuel (supply) and that is why there are long queues for fuel.

HUDO Centre is concerned about the safety of civilians in Sudan during this difficult period of fighting between SAF and RSF/ TASIS and calls for the following:

- The relevant international organisations and human rights mechanisms to investigate drone attacks and document the impact on civilians together with their infrastructure.
- The fighting parties to refrain from attacks that put civilians at risk and to comply with the International Humanitarian Law protocols.
